(Applicant's Information)

### REQUIRED CONDITIONS

Prior to the demolition of any building serviced by the Mount Holly Municipal Utilities Authority (MHMUA), the service lateral must be cut and capped or plugged. The MHMUA will notify the appropriate township that the requirements of the MHMUA for demolition have been satisfied once the following conditions are met.

1. The Owner shall notify the MHMUA at least 24 hours in advance of the sewer service lateral disconnection work.
2. Service lateral connections must be cut and permanently capped or sealed at a location to be determined by the MHMUA at the time of application for termination of service.
3. A plastic cap shall be installed on the terminal end of plastic sewer lines using plastic cement or PVC glue.
4. One linear foot of concrete shall be installed inside the terminal end of the lateral extending from the sanitary sewer main of the following types of pipe:
  - ACP- (asbestos cement pipe)
  - VCP - (vitreous clay pipe)

- Orangeburg - (bituminous coated cellulose)
- Cast iron pipe
- Ductile iron pipe

5. A sketch of the proposed service lateral termination must accompany each completed application for termination of sewer service.
6. It is the property owner's responsibility to notify the township in which the property to be demolished is located in order to obtain authorization to demolish. Townships may not allow demolitions until MHMUA requirements have been met.
