RESOLUTION 2017-07

**A RESOLUTION OF THE MOUNT HOLLY MUNICIPAL UTILITIES AUTHORITY
AUTHORIZING ENGINEERING SERVICE CONTRACT WITH PENNONI FOR
THE P.A.A PILOT STUDY.**

Chairman Thiessen asked Executive Director Maybury to explain. Executive Director informed the board resolution 2017-07 is for an essential study that will allow the MHMUA to move forward to meet compliance with the latest New Jersey Department of Environmental Protection Discharge Permit renewal. There is an added requirement to reduce or remove certain disinfectant byproducts created by sodium hypochlorite (bleach). This trial will allow the MHMUA to evaluate a chemical for disinfection that will bring the MHMUA into compliance once the new regulation becomes effective two years from now. This study is a time sensitive process, there is much effort and time involved with bid the phase, specification preparation, coordinating with the NJDEP and a possible permit modification. If this contract is awarded, Pennoni will handle the entire procedure. Chairman Thiessen interjected stating the NJDEP has established a limit for hypochlorite. Executive Director Maybury explained the new permit has included a reduction to the discharge limit of chlorine from less than 1.0 part per million to less than 0.02 parts per million. Other compounds are created by hypochlorite and they are required to be reduced or eliminated as well. The pollutants of concern the NJDEP has targeted for reduction or removal are trihalomethanes and bromodichloromethane is of particular interest. This proposed trial will test the effectiveness of peracetic acid as a disinfectant in lieu of sodium hypochlorite.

Commissioner Silcox moved to approve Resolution 2017-07 authorizing engineering service contract with Pennoni for the P.A.A pilot study. Commissioner Jones seconded the motion. At the call of the roll, the vote was:

RESOLUTION 2017-29

**A RESOLUTION OF THE MOUNT HOLLY MUNICIPAL UTILITIES AUTHORITY
AUTHORIZING ENGINEERING SERVICES WITH ALAIMO FOR UPGRADES TO
PUMP STATION 213 (GARDEN STREET)**

Executive Director Maybury stated that this pump station was built around 1972, which is outdated and in need of replacement. The MHMUA is under significant flow potential from growth in Eastampton Township. There are currently 452 units under proposal at the sod farm on Smithville Road and another 240 from another development proposed at the former Gregory's site. Due to the age and type of this pump station it will not be able to handle the foreseen growth. Not only is the current pump station incapable, but the station also has confined space requirements deeming it unsafe. If approved, this resolution would allow Alaimo Associates to design a new pump station meeting the current and future flow contributions from this service area. Mr. Alaimo explained they design the new stations based on the zoning of the township and the proposal would be for the pump station and not for new sewer lines to and from the station. Commissioner Banks asked if the pump station would be in the same location and if there would be a disruption in service. Executive Director Maybury confirmed the pump station will stay in the same location and there will be no disruption in service during this project. Chairman Thiessen asked about odor control. Executive Director Maybury explained that a biological odor control system, similar to the systems at Rancocas Road treatment facilities would be utilized for hydrogen sulfide (H₂S) control and the station would discharge little to no smell.

Commissioner Jones moved to approve Resolution 2017-29 authorizing Engineering Services with Alaimo for upgrades to Pump Stations 213 (Garden Street). Commissioner Banks seconded the motion. At the call of the roll, the vote was:

AYES: Commissioner Banks, Commissioner Jones, Commissioner LaPlaca
